HENDON WARD PROFILE

Key 2001 Census Statistics

The 2001 Census provides a uniquely accurate and comprehensive picture of the borough. This ward profile is one of a set of 21 compiled to help local analysis and comparisons. Each table gives the number and percentage of the ward's residents, households or dwellings that fall into a variety of categories and ranks the per cent with the other Barnet wards, giving the overall Barnet percentage

All data in this profile is drawn from Census 2001 Key Statistics. It is Crown copyright and may be reproduced only with permission of the Controller of HMSO.

Summary Key Facts

- Within Barnet there is a correlation between wards having a high Jewish and White Other population and those not stating their religion. Hendon has the third highest percentage of its population who are Jewish and the fourth who are White Other: it also has the second highest proportion who preferred not to state what their religion is. One possible explanation for this is that many Jewish refugees from Fascism in Europe are likely to describe themselves as White but not British and to have a disinclination to provide information about their religious beliefs to the state.
- Hendon has the second highest proportion of its population aged 16 to 74 who are students: 15%
- 53.2% of dwellings in Hendon are flats, maisonettes or apartments, the second highest proportion in Barnet.

Basic Data
